## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 are drawn toward a method of forming a key message, classified in 380/277 (Key Management).
- II. Claim 11 is drawn toward a method of identifying a communication protocol used by a device for the transmission of a key message, classified in 713/171 (*Particular Communication Authentication Technique: Including Key exchange*).
- III. Claims 12-18 are drawn toward a method of determining whether a particular device is a device targeted to receive a key message, classified in 380/278 (*Key Management: Key Distribution*).

The inventions are distinct, each from each other because:

Inventions I,II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case, invention I is a method of forming a key message which is separately usable from II and III. The method of invention I is applicable to a variety of systems which employ key message formation. Furthermore, invention I is separate from invention II because invention I is applicable to a system which does not identify whether a communication device recognizes a particular protocol. Invention I is separate from invention III because invention I is applicable to a system which does not determine whether a particular device is a target device.

Finally, invention II and invention III are distinct from each other because they can be separately usable. Invention II is applicable to a system which does not check whether a communication device is a target device. Invention III is applicable to a system which does not identify the communication protocol used by a communication device. See MPEP 806.05(d).

Application/Control Number: 09/938,184

Art Unit: 2137

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper. Furthermore, since the claims as filed contain three distinct inventions classified in three separate classes, the claims present a burden to the examiner because an adequate and thorough search requires three separate search strategies. A complete response to this requirement must include an election of the invention to be examined, even if the requirement is traversed.

## Conclusion

A shortened statutory period for response to this action is set to expire one month (not less than 30 days) from the mail date of this letter. Failure to respond within the period for response will result in ABANDONMENT of the application (see 35 U.S.C. 133, M.P.E.P. 710.02, 710.02(b)).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Schubert whose telephone number is (571) 272-4239. The examiner can normally be reached on M-F 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor,

Andrew Caldwell can be reached on (571) 272-3868. The fax phone number for the organization where
this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
